

Announcing Kluwer's Integrated Series in Information Systems

<http://www.wkap.nl/prod/s/ISIS>

Series Editors:

Ramesh Sharda, *Oklahoma State University*

Stefan Voss, *Universität Hamburg*

Integrated Series in Information Systems (IS)²¹ aims to publish scholarly work in a book series. The series will strive to publish work in the technical as well as the organizational side of the field. This series will contain three sub-series including: monographs, handbooks, and edited volumes. The Expository and Research Monographs as well as the Integrative Handbooks sections will focus on the state-of-the-art of application domains and/or reference disciplines, as related to information systems. In a parallel effort—recognizing that some of the cutting edge research in IS will be coming from doctoral research—selected dissertations may also be published in the monograph section of the series. The Edited Numbered Volumes will be guest-edited by experts and will also feature books based on refereed papers from selected conferences.

Proposals are invited for a book to be published under one of the sub series. Publish your dissertation or write a monograph or an integrative handbook. Edit a book in your research area. If you are organizing a conference, develop a refereed collection of chapters based on the conference. This series will focus on high quality scholarly publications, and you will benefit from Kluwer's international network for promotion of your authored/edited book.

If you are interested in developing a book, please contact the series editors or visit the series website at <http://www.wkap.nl/prod/s/ISIS> to download a prospectus document.
